

CSCI 3308 Milestone 3

11/3/2017

Team name - The Mountaineers

Members - Megan Byers, Lucas Reed, Lindsay Walton, Elliot Whitehead

DBMS software choice:

We will be using Postgres for our Database Management System. We chose this because it is a robust industry standard, and has great documentation and support from a strong community.

Scripts to create & populate database, tables, columns:

We are using a Ruby on Rails web framework which will use this seeds.rb file to build the database tables and populate it with data.
